

All INTEROR staff are involved with safety and are committed to the prevention of industrial risks on a daily basis through their actions in the following areas:

Regulatory compliance:

- *We implement applicable regulatory demands and requirements and maintain the integrity of our facilities.*

Process control:

- *We develop safe processes and implement the inherent, if not technical, and then organizational risk management measures required.*
- *We do not accept degraded operating conditions or situations without reacting or taking compensatory measures.*
- *We prepare for emergencies and maintain our ability to respond and mobilize in the event of an accident.*
- *We regularly invest to improve our processes.*

Communication and training:

- *We are constantly training and developing our skills.*
- *We communicate openly and in a forthright manner.*
- *We hold all stakeholders accountable to the operational discipline required for the operation and maintenance of our facilities.*
- *We share feedback and learn from any incidents for continuous improvement.*

Geoffroy Waroqueaux

The President
